## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 14-19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a method, process or system for performing an addition via a mathematical algorithm to produce a sum result. The claims are not limited to a practical application of the mathematical algorithm because the addition result is not a useful, concrete and tangible result. More specifically, the addition result is not a tangible result because it is not a real-world result. Relative to claims 18 and 19 the “product” and “system”, respectively, are of such a scope so as to preempt the mathematical algorithm.

Claims 14-17 are directed to a program per se. While the program contains functionally descriptive material the recording of the functionally descriptive material on some computer-readable medium, which would enable the functionality to be realized, fails to be recited.

### *Allowable Subject Matter*

2. Claims 1-13 are allowed.
